# AXIS DOUBLE-SIDED DESK
Installation Guide

1

A

A
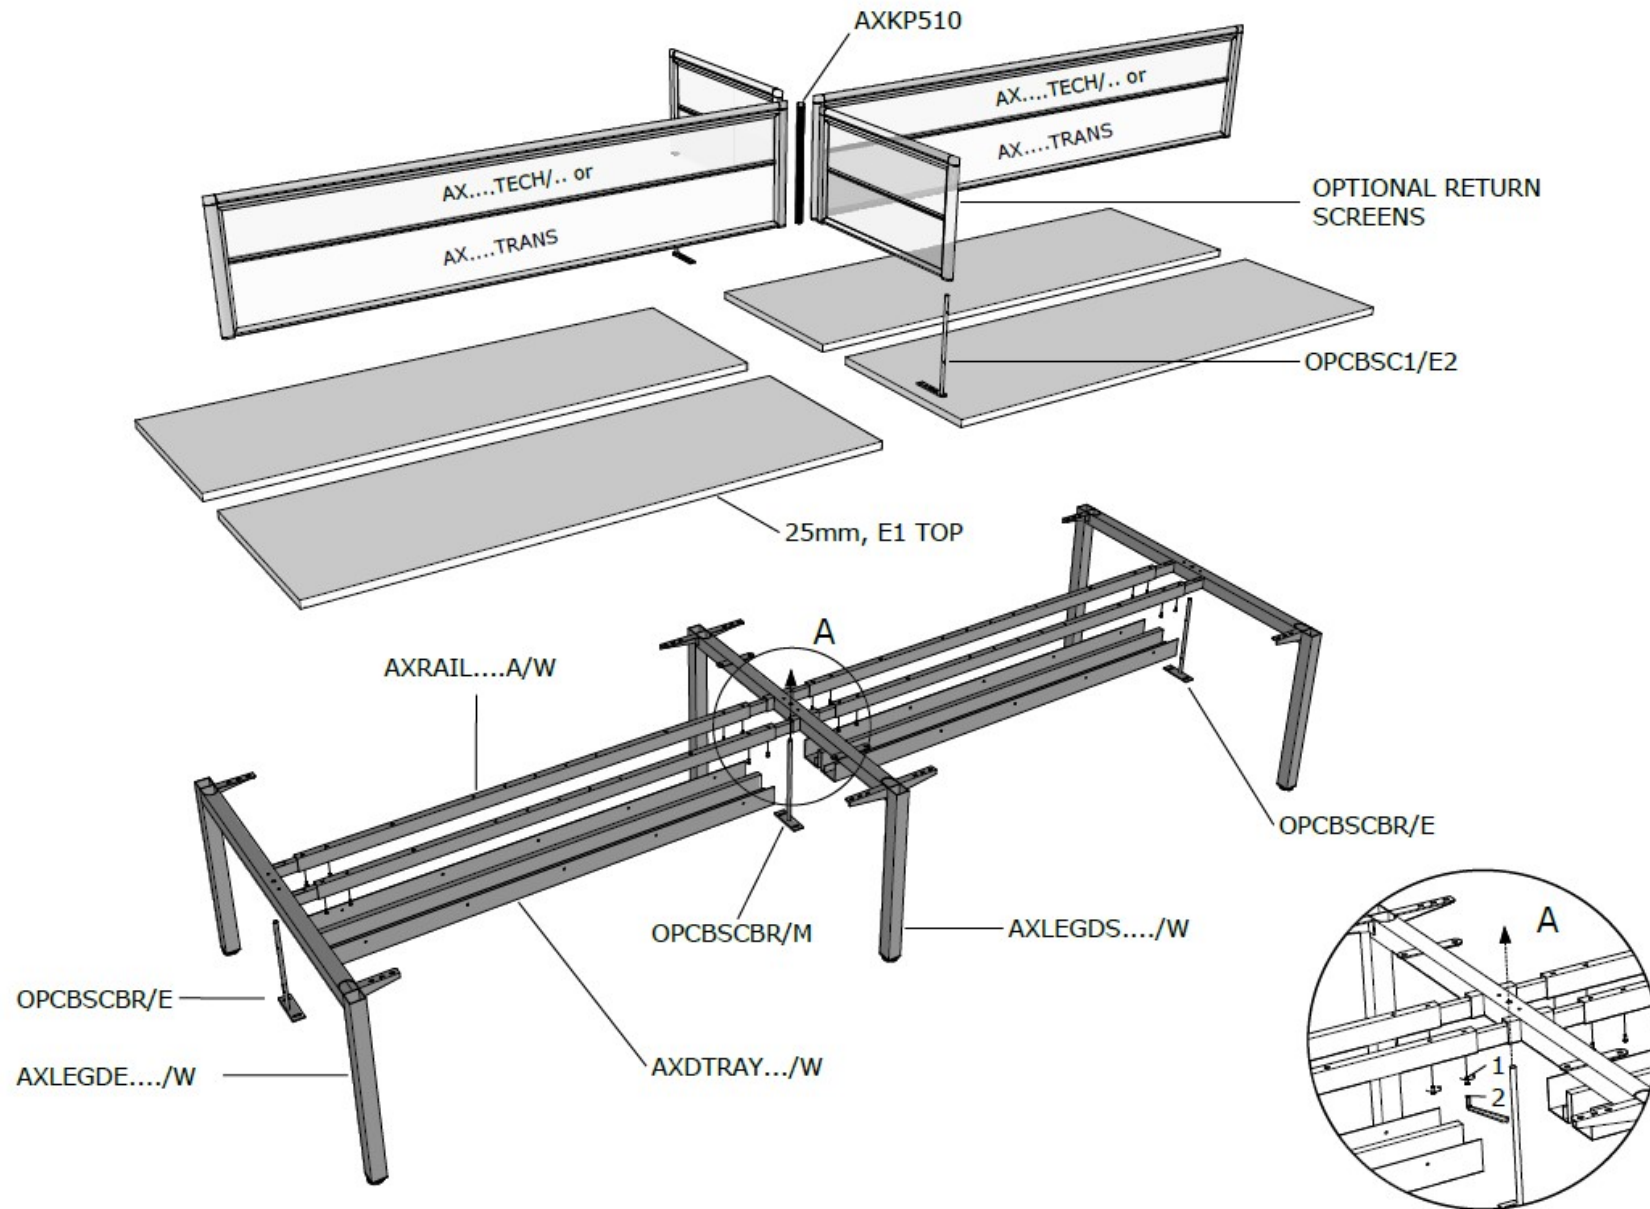

Assemble frames & rails together, <u>loosely</u> (1 turn from tight).

2

Assemble screen brackets to frame, <u>loosely</u> (1 turn from tight).

**3**

DESK TOP

DESK SIDE RAIL

SCREW

5mm

Fix desk top with 5mm overhang over metal frame. Where desktops but together, make sure these are fitted tight together.

4

Carefully remove end seal on screen & fit screen between end brackets & screw self tappers to fix screen tightly.

AXIS DOUBLE-SIDED DESK
## Installation Guide

5

Slide screen pole over bracket & attach screens to pole with top slug connectors.

6

If not using wing screens then gently attach the 3 caps simultaneously tapping into position.

7

ENDS IN FIRST   ENDS IN FIRST

If for whatever reason you have to remove the top seal, then to refit, slightly arc in the middle, placing the 2 ends into location, & gently tap down.
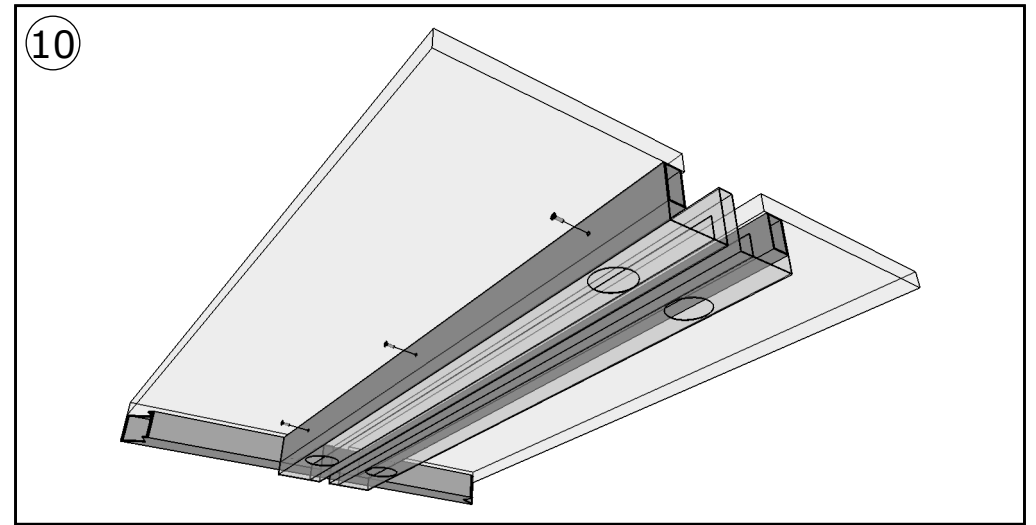

8

RAIL   DATA PLATE

Fit data rails with screws into rails.
