

FulcrumDual

a seamless view

The Fulcrum Dual Monitor Arm creates a harmonious dual monitor workflow. While supporting even the largest monitors, the single slide bar allows you to perfectly align level your monitors with a seamless join. Keep your cables camouflaged with built in cable management and keep you entirely focused on your task at hand.

Swivel Range: +10° ~ -10°
Screen Rotation: +180° ~ -180°

Finishes:

Black Powdercoat

Limited Base Rotation for Better Workspace Control

Our monitor arms feature a limited base rotation system that helps keep monitors within each user's workspace.

A discreet locking screw prevents the arm from rotating into adjacent stations, ideal for narrow 24" deep dual sided workstations without a center spine screen.
